WEST HIGH YIELD (W.H.Y.) ANNOUNCES FINANCIAL RESULTS AND OPERATIONAL UPDATE

CALGARY, ALBERTA, - August 25, 2006. West High Yield (W.H.Y.) Resources Ltd. ("West High Yield" or the “Company”) is pleased to announce its financial (unaudited) results for the second quarter ended June 30, 2006 and the Management’s Discussion and Analysis (“MD&A”) dated August 25, 2006. On July 27, 2006, the Company completed its initial public offering of securities (the “Offering”) which was fully subscribed for gross proceeds of $2,000,000. The following summarizes key information contained in the interim financial statements and MD&A both of which can be found on the SEDAR website at http://www.sedar.com.

On June 30, 2006 and prior to the Offering, the Company had a net loss of $373,124 and a working capital deficiency of $1,964,459. The major component that caused the deficiency was an amount due to a company under common control that funded the operations of the Company to date. On the date the Company completed the Offering, the Company exchanged 5,090,144 units for $2,036,057.59 of debt outstanding at that date. Each unit consists of one common share of the Company and one-half of one common share purchase warrant. Each whole warrant entitles the purchaser to acquire one common share at an exercise price of $0.50 for a period of six months from closing of the offering and at a price of $0.60 for six months thereafter. As a result of the Offering and the share exchange, the Company is in a positive working capital position as of the date of completion of the Offering.

The Company also announces that it is proceeding with its previously announced Diamond Drill Program on its Midnight and IXL Properties located on the western outskirts of Rossland in southeastern British Columbia. To date, nine core holes have been completed and cores have been sent to an independent laboratory for analysis. Results will be released once they have been received by the Company.

West High Yield (W.H.Y.) Resources is a junior mining exploration company focused on the acquisition, exploration and development of mineral resource properties in Canada with a primary objective to locate and develop economic gold properties.
